# Erratum to: 'Characteristics of body composition and cardiometabolic risk of Japanese male heavyweight Judo athletes'

Hiroko Murata<sup>1</sup>, Satomi Oshima<sup>2</sup>, Suguru Torii<sup>2</sup>, Motoko Taguchi<sup>2</sup> and Mitsuru Higuchi<sup>2\*</sup>

Unfortunately, the original version of this article [1] contained an error. The caption for Fig. 1 was included incorrectly. The correct caption can now be found below.

Fig. 1 Comparison of prevalence in cardiometabolic risk in terms of blood biochemical parameters. Prevalence of cardiometabolic risk presents the percentage over the referenced normal range of respective parameters. The cut-off referenced normal range were as follows: AST > 40 (U/L), ALT > 45 (U/L),  $\gamma$ -GTP  $\geq$  80 (U/L), HDL-C < 40 (mg/dL), LDL-C > 140 (mg/dL), TG  $\geq$  150 (mg/dL), UA > 7.0 (mg/dL), HOMA-IR  $\geq$  2.5. \*Significant differences compared with Nonheavyweight group,  $p < 0.05$ .

Submit your next manuscript to BioMed Central and we will help you at every step:

- We accept pre-submission inquiries
- Our selector tool helps you to find the most relevant journal
- We provide round the clock customer support
- Convenient online submission
- Thorough peer review
- Inclusion in PubMed and all major indexing services
- Maximum visibility for your research
